Location: Lahore, Pakistan

SUMMARY

Passionate Web Developer with expertise in JavaScript, React.js, and Python, specializing in AI-powered applications and modern web technologies. Experienced in developing and integrating interactive UI components, managing RESTful APIs, and deploying scalable solutions. Adept at leveraging Redux for state management and utilizing machine learning libraries for AI-driven functionalities.

EXPERIENCE

React JS Developer - BlenSpark | Lahore Sep 2024 – Present

- Developed an AR/VR model configurator using React, Three.js, and Tailwind CSS.
- Integrated Shopify backend storefront API for seamless e-commerce transactions.
- Improved responsiveness and developed the tech page and footer for the company website.
- Working on a dynamic travel agency website with advanced search and booking features.

React JS Intern - BlenSpark | Lahore Sep 2024

- Designed and developed a portfolio website and landing pages using React.js, Redux, and Bootstrap.
- Optimized UI designs and implemented various reusable React components
- .

EDUCATION

BS Artificial Intelligence (In Progress)

University of Management and Technology | 2022 - 2026

FSC Pre-Medical

Punjab College Sahiwal | 2019 - 2021

SKILLS

Programming Languages: Python, JavaScript, TypeScript, HTML, CSS, RESTful APIs

Frameworks/Libraries: React.js, Redux, Next.js, Bootstrap, Tailwind CSS, Three.js, Django

Development Tools: Git, Vite, Webpack, Cloudinary, Shopify API

AI/ML: Machine Learning, Scikit-Learn, Pandas, NumPy, OpenAI API, Pytorch, Keras

Soft Skills: Communication, Problem-Solving, Team Collaboration

PROJECTS

AR/VR Model Configurator (React, Three.js, Tailwind CSS, Shopify API)

- Developed a customizable AR/VR model viewer with adjustable levels and scale options.
- Integrated Shopify checkout for seamless transactions.

Added export functionality for model viewing on iPhones

◇ Promptopia (Next.js, Node.js, MongoDB)

Built a modern full-stack Next.js application for prompt sharing, integrated with MongoDB as the database and Node.js for backend logic.

Implemented Google OAuth for secure login and authentication, ensuring user privacy and access control.

Designed intuitive and responsive UI using Tailwind CSS and dynamic routing with Next.js App Router.

Enabled real-time prompt posting, editing, and deletion functionality, showcasing a complete CRUD cycle.

Deployed and maintained the app with a focus on performance and SEO optimization using Next.js features.

SmartPrep – Full-Stack RAG-Based Chatbot (LangChain, Python)

Developed a full-stack **Retrieval-Augmented Generation (RAG)** chatbot application for exam preparation and rapid revision, powered by **LangChain** and **LLMs**.

Built the frontend using a **Python GUI library** (e.g., **Streamlit**) for a clean and interactive user experience, allowing seamless file uploads and chat interface.

Enabled users to upload **multiple file types** including **PDFs, PowerPoints, and Word documents** to extract and index content.

Implemented an intelligent chatbot capable of answering user questions directly from uploaded content, making it ideal for short-term study and topic revision.

Integrated **LangChain** with custom document loaders, chunking, embeddings, and vector search to provide accurate, context-aware answers.

Enhanced usability with features like **multi-file support, real-time response streaming**, and a **searchable document knowledge base**.
